## EXPERIENCE

---

### WEB DEVELOPER

04/2022 - Present

Hans Development

- Search for VPS market that meets company standards and website needs and is fully responsible for all VPS purchase transactions.
- Installing, configuring, and performing maintenance on a VPS with Ubuntu OS and the NGINX web server, as well as setting up a GUI/cPanel display for company convenience in monitoring existing VPS.
- Develop child websites with company standards (Currently, 20 websites have been successfully created with CMS Wordpress).
- Create a custom theme for the parent website that maintains website speed in terms of mobile above 50 and desktop above 70, and is able to make websites compatible with AMP.
- Configure the company's standard SEO for parent and child websites to make it easier for the SEO field to enter keywords, descriptions, and other content.
- Conducting overall testing in terms of features, appearance, components of the parent and child websites that have been created.
- Routine maintenance for all existing VPS and websites.
- Make reports for every task that has been done in terms of purchasing a VPS, server IP, DNS, website access, and testing results are all done in Google Sheets.
